Description of Item	Serial Number	Status

Replacing the cell(s) in a battery includes connectors and switch repair if necessary. Battery cells are a flat rate shown below and include ground shipping in the continental U.S. By sending items in for repair you agree to pay the following amounts should the items need repair or replaced. We recommend including chargers and cables for testing. Damaged cables or connectors can cause problems that are mistaken for problems with the battery. If an item is found to be in good working order, only shipping charges will apply if no battery repairs are necessary. If you wish to order new products with the return of your repair to save on shipping please let us know. (All prices are in US Dollars.)

- Repairing connectors on a battery or cable is a flat \$25.00 fee per item.
- Items that are damaged beyond repair will be replaced at 50% off our current list price.
- Older 30 Watt or current 40 Watt units receive one 40+ watt cell and will be returned as a 40+ Watt unit, cost: \$150.00
- Older 60 Watt or current 80 Watt units receive two 40+ watt cells and will be returned as a 80+ Watt unit, cost: \$300.00
- Older 90 Watt or current 120 Watt units receive three 40+ watt cells and will be returned as a 120+ Watt unit, cost: \$400.00*
- Older 120 Watt or current 160 Watt units receive four 40+ watt cells and will be returned as a 160+ Watt unit, cost: \$475.00*

*Larger cells will add up to one week for processing of a repair because the larger cells are made to order and final testing takes longer.

We will call for credit card information or make check payable to: Digital Camera Battery, Inc. Florida residents add 7% sales tax.
